Description of Fees and Refund Policy:

Organic Certification Program Fees:

- Basic Fee:** This fee is due each year with your Organic System Plan or Annual Update. It covers your basic certification services for the upcoming certification season, including review of your certification documents for compliance with regulations and inspection expenses other than the inspector's hourly fee. It entitles you to all membership benefits, including the PCO certification manual, material lists and review services, recordkeeping system, newsletter, and educational events & materials at no additional charge. You also have direct access to your certification specialist's expertise via phone, mail or email.
- Sales Assessment:** The sales assessment fee is calculated on your annual gross organic sales for farming, handling and processing operations in the previous year. You will receive an invoice for these fees after we receive your application or annual update. The fee for broker/distributors and operations that only re-package organic products is calculated on the difference between the purchase and sale price of organic products. For those that copack, handle and/or produce organic product, and do not "sell" products but are paid a fee for the service, this fee is assessed on the gross income obtained from handling or processing organic products. No sales assessment is charged to operations with \$5,000 or less of organic sales. Organic sales will be verified at the time of inspection. PCO reserves the right to adjust the sales assessment charge based on information gathered at the inspection.
- Type of operation:** Additional fees will be assessed for the type of operation (e.g. Dairy, Processor/Handler) if requesting certification in other scopes. These fees cover the additional time and expertise required to certify operations that are more complicated than those with only crops or land.

Inspection Fees:

- Annual Inspections:** The cost of your inspection is charged at an hourly rate. The final cost for inspection varies based upon the complexity of the operation inspected, the ability to group with other nearby inspections, the individual inspector assigned, and how long the inspection takes. Operation complexity may consist of things like operation size, length of time certified, number of certified products, whether any international equivalencies are requested, whether there's parallel uncertified production, whether there's any on-farm post-harvest handling, past noncompliances, past inspection length, etc. PCO works hard to coordinate inspections in geographic regions to minimize travel time. You can lower your costs by having records and materials close at hand and well-organized when the inspector arrives. Inspections may be announced or unannounced. There is no charge for partial unannounced inspections (i.e. conducted outside of the annual inspection). Contact PCO for additional information on scope specific inspection averages.

- **Inspection Cancellations:** If you cancel a scheduled inspection with less than 5 days' notice (from the date of the scheduled inspection), you will be assessed the inspector's preparation time, reimbursable expenses (travel, lodging, etc.) that have been incurred for the planned trip, as well as an administrative fee of \$100 USD. If the inspector is en route, the client will be billed for travel time, in addition to the above listed costs.

Administrative Fees:

- **Expedited Certification:** PCO offers a nonrefundable expedited certification service for those operations who have critical timing needs. While expedited services do not guarantee certification will be granted by a specified date, your certification request will receive priority processing and inspection assignment. The success of the expedited service lies in your ability to comply with the National Organic Program and your timely responses to requests for information. If you enroll in the expedited services program, PCO provides the following:
 - Application receives expedited attention for initial review and processing
 - Inspection will receive prioritized attention for assignment
 - The inspection report will be submitted within five (5) business days of the Exit Interview
 - PCO will review the inspection report within five (5) business days and identify any outstanding issue to grant certification

Certification cannot be guaranteed by a certain date and PCO has the right to refuse service for expedited requests if we do not have the administrative capacity to do so. In some cases, requests for this service may be outside of a geographical area in which we normally do business or may be at a high-volume service period. In these cases, PCO will communicate if we are unable to meet your request of expedited service.

- **Expedited Product Review:** Rush review does not guarantee approval. PCO staff will review each product requested for review within five (5) business days. This fee is charged per product. A product review includes new products including labels and revisions to existing products including labels. Non-expedited product review requests are typically reviewed by PCO staff within ten (10) business days.,
- **Expedited Export Certificate:** Rush review does not guarantee approval. PCO staff will review your export certificate request within two (2) business days. This fee is charged per export certificate request. This includes EU COIs, Korea NAQS, Japan TM-11, Transaction Certificates, etc. Any product reviews needed for export certificate approval will also be charged an expedited product review fee. Non-expedited export certificate requests are typically reviewed by PCO staff within ten (10) business days.
- **Reinstatement Fee:** A reinstatement request often demands the dedication of considerable staff hours. Therefore, those operations who have been suspended from USDA NOP and are in need of reinstatement to the National Organic Program are assessed a Reinstatement Fee which covers staff time that is not considered part of a normal certification request. This fee is in addition to all other certification and inspection fees.

Refund Policy: Refunds are based on the amount of work performed. Organic Certification Program fees (section A) are eligible for a 50% refund of fees paid in the current calendar year, if the initial review has not been complete. If the initial review was completed the fees paid are non-refundable and any outstanding invoices not yet paid will be turned over to collections. If you are denied certification, suspended or revoked, certification fees are nonrefundable and all invoices must be paid according to terms; inspection charges must be paid if the inspection was conducted. All Inspection fees (section B) and Administrative fees (section C) are non-refundable.

Organic Certification Cost Share Program: Certified clients are eligible for reimbursement of up to 50% of certification fees per each scope. For example: If certified for crops and dairy, each of which is considered a category (or scope) you would qualify for up to 50% reimbursement for each scope, not to exceed \$500 per category, per year. Contact your local FSA office or participating state agency to apply for the Organic Certification Cost Share Program.

This fee schedule is effective January 1, 2022 through December 31, 2022.
